

Tailwind CSS Basics

Assignment

1. For this assignment module, your task is to create a blog webpage. To begin, in this coding challenge, you need to import tailwind CSS into the project. You are expected to use only the typography properties provided by tailwind CSS to achieve the desired output described below.

The Real Leadership Lessons of Steve Jobs

Six months after Jobs's death, the author of his best-selling biography identifies the practices that every CEO can try to emulate. [by Walter Isaacson](#)

2. Moving forward with the design of our blog webpage, let's explore images, layouts, and borders. By utilizing the flex and border properties offered by tailwind CSS, aim to achieve the desired output as described below.

The Real Leadership Lessons of Steve Jobs

His saga is the entrepreneurial creation myth writ large: Steve Jobs cofounded Apple in his parents' garage in 1976, was ousted in 1985, returned to rescue it from near bankruptcy in 1997, and by the time he died, in October 2011, had built it into the world's most valuable company. Along the way he helped to transform seven industries: personal computing, animated movies, music, phones, tablet computing, retail stores, and digital publishing. He thus belongs in the pantheon of America's great innovators, along with Thomas Edison, Henry Ford, and Walt Disney. None of these men was a saint, but long after their personalities are forgotten, history will remember how they applied imagination to technology and business.

Assignment

4. In this coding challenge, let's explore the different variations of borders offered in CSS. Using the border properties provided by tailwind CSS, attempt to achieve the desired output described below.

“The people who are crazy enough to think they can change the world are the ones who do.”
—Apple’s “Think Different” commercial, 1997

5. Continuing with the design of our blog webpage, let's now delve into the grid layout. Utilize the grid layout properties provided by tailwind CSS to achieve the desired output described below.

“The people who are crazy enough to think they can change the world are the ones who do.”
—Apple’s “Think Different” commercial, 1997

One of the last times I saw him, after I had finished writing most of the book, I asked him again about his tendency to be rough on people. “Look at the results,” he replied. “These are all smart people I work with, and any of them could get a top job at another place if they were truly feeling brutalized. But they don’t.” Then he paused for a few moments and said, almost wistfully, “And we got some amazing things done.” Indeed, he and Apple had had a string of hits over the past dozen years that was greater than that of any other innovative company in modern times: iMac, iPod, iPod nano, iTunes Store, Apple Stores, MacBook, iPhone, iPad, App Store, OS X Lion—not to mention every Pixar film. And as he battled his final illness, Jobs was surrounded by an intensely loyal cadre of colleagues who had been inspired by him for years and a very loving wife, sister, and four children.

6. Sometimes, instead of using static images, CSS can provide a more flexible solution. One such example is designing a default profile picture using the first letter of the user's name. In this coding challenge, utilize tailwind CSS properties to achieve the desired output described below.

M

Walter Isaacson, the CEO of the Aspen Institute, is the author of Steve Jobs and of biographies of Henry Kissinger, Benjamin Franklin, and Albert Einstein.

7. To finalize the design of our blog webpage, it is crucial to incorporate a subscription section that can be utilized for marketing purposes. In this coding challenge, try to add a subscription section following the specifications illustrated in the provided image.
